Memories or anecdotes

Seeing the world for free, there are too many to list – but my all time favorite, had to be one with the wonderful people I got to work with (which I have already mentioned on the website) with Steve Tester, Dave Harrington and John Lievers in Kathmandu -> pulling an engine out of one of the Bedfords – when Steve had his “Asian fart”.

After all the laughs with the nasty/smelly result – we continued work – repairing a Gearbox (for the 541st time!) – with a running commentary from Steve, conveying his thoughts on “British” Bedford technology! Never passed the EO requirements for mechanical knowledge - but not for lack of trying....

Many happy parties at the Hitchen residence during the “silly season”. Thanks to Peter Mac, “Gas Axe” Bill, and Tony Watson for the knowledge (and hangovers).

Most of all – thanks to ALJ for making the above happen in the first place!
